

## References for technical system documentation

HAUK & SASKO combines high technology with tradition. HAUK & SASKO mbH was founded in 1950 as an engineering consultant for electrical engineering in Bochum. In 1981 a new division, Information Systems, was established in Stuttgart. Since then HAUK & SASKO has developed solutions for fuel management, professional knowledge and document management systems and technical documentation.

- introduction of UKIS as a document system for the technical facilities as well as standard solutions for Information and Document Management

- introduction of UKIS as a knowledge portal and power plant information system
- technical system documentation
- document management
- content management
- web-based management of operational documentation

- plant documentation system for more than 40 industrial contracting systems
- provision of all documents in relative conditioning context
- collection of process-/ energy data, long term archiving of data
- operational documentation: capture of system faults in an electronic event management

Acetow

- technical system documentation and compilation of operational data in the site power station

## HAUK & SASKO

### *Innovative software with decades of market experience*

UKIS, BaBs and MBS have proven themselves in customised implementations in more than 20 years of market presence. HAUK & SASKO offers you well-engineered software solutions which are adjusted according to individual customer needs through constant further development.

Our clients include small and medium enterprises in energy and waste disposal, chemical and pharmaceutical, food and trade as well as the manufacturing industry and services sectors. And conglomerates also rely on our years of experience and competence.
